The Wardrobe Man with elfa®

A simple solution to a messy problem

What is elfa?

The entire elfa range is epoxy bonded steel rather than painted or vinyl-coated and will resist chipping, scratching and staining. The white stays white and the platinum system just carries on looking great for years!

All the wooden fascia and gliding frame elements of our stylish elfa decor range are just that. solid wood!

User friendliness is a key word for elfa's storage solutions. All you need to screw into the wall is the hang track. Once you install your track and make sure it is level, everything else will automatically be straight.

Our elfa components and accessories are designed to be adaptable so you can select and arrange them in a way that best suits your particular space, lifestyle and budget. If you move house or your needs change, the system can be easily taken-down, added to or moved without leaving nasty holes all over your walls.

elfa® is undeniably the best storage solution available today. Its beauty, quality, design and flexibility make it the perfect choice to organize every room in your home. Let our experts design your space with elfa® today.
For almost fifty years elfa's simple idea for storage solutions has grown from strength to strength.
